

CNG 2026 Community Partner Program

Five cities. Four countries. One partnership.

Put your organization in front of the cloud-native geospatial community at five events across four countries in 2026. One package, one agreement, logo on every event.

About Cloud-Native Geospatial Forum (CNG)

The Cloud-Native Geospatial Forum convenes events, creates content, and provides educational opportunities for data practitioners working to make geospatial data easier to access and use. CNG is an initiative of Radiant Earth, a 501(c)(3) nonprofit.

The 2026 CNG event series

CNG is going global in 2026 with five events across the UK, Japan, the United States, and Switzerland. Each event brings together geospatial data practitioners, engineers, researchers, and decision-makers for a day of experience-driven talks, lightning presentations, and networking.

Event	Date	Location
CNG London	23 June	The Jellicoe - London
CNG Tokyo	24 August	TBD - Tokyo
CNG NYC	Week of September 21 NYC Climate Week	Cooper Union - NYC
CNG Forum 2026	6–9 October	The Cliff Lodge - Snowbird, Utah
CNG Zürich	29 October	Meta - Zürich

Community Partner — \$5,000

One price. One agreement. Your organization’s logo and name associated with all five CNG events in 2026.

Community Partners receive recognition at every CNG event across the year, putting your organization’s name in front of the global cloud-native

geospatial community without the logistics of negotiating five separate sponsorships.

What’s included across all five events:

- Your logo on all event materials, including websites, signage, slides, and emails, for London, Tokyo, NYC, CNG Forum 2026, and Zürich
- Organization listed on every event registration page and agenda
- Dedicated callouts on CNG social media channels at each event
- Mentioned in all event communications and the CNG newsletter year-round
- “CNG 2026 Community Partner” designation in all series communications

Community Partnership is a visibility-focused program. It does not include speaking slots, tables, or booth space. Those benefits are offered as separate event-specific sponsorships at each stop on the series.

Bundle with CNG Membership

Organizations that renew or join CNG Commercial Membership alongside Community Partnership receive both benefits with a discount:

For new CNG Commercial Members

Component	Value
CNG Commercial Membership (annual)	\$5,000
2026 Community Partner (all 5 events)	\$4,000
Total	\$9,000

For renewing CNG Commercial Members

Component	Value
CNG Commercial Membership (annual)	\$5,000
2026 Community Partner (all 5 events)	\$3,000
Total	\$8,000

CNG Commercial Membership includes a complimentary exhibitor booth at CNG Forum 2026, access to member-only webinars and programming, and year-round organizational recognition on cloudnativegeo.org as a Commercial Member.

Why partner with CNG

Sustained visibility across the year. A single event is a moment. A Community Partnership means your organization is a familiar, trusted presence in the community, at events in London, Tokyo, New York, Snowbird, and Zürich.

Reach a global audience. Each CNG event draws a different regional audience of practitioners and decision-makers. Community Partners connect with the full breadth of the cloud-native geospatial community, not just one slice of it.

Simplified partnership. One agreement, one point of contact, one relationship, instead of negotiating five separate sponsorships. We handle the logistics across all five events.

Support open community infrastructure. Community Partner contributions directly fund the programming, travel, and production costs of bringing CNG events to practitioners around the world.

Event-specific sponsorships

Organizations looking for deeper visibility at a particular event, such as hosting a reception or sponsoring exhibition space, should contact us about event-specific sponsorships for CNG Forum 2026 or any of the single-city stops. These are offered in addition to Community Partnership.
